HEAT & GLO™

Where everything comes together

Brilliant heat, beautiful to watch!

Now featuring the very latest in gas fire technology - the Intellifire Ignition System

There's nothing like the warmth and inviting ambience of Heat & Glo - the leader in functional innovation and fireplace design.

Whether you're building, extending or simply renovating, no fire should be anything other than a Heat & Glo, the quality choice for your home.

The Heat & Glo range now features the all new IntelliFire Ignition System - you'll never have to bend down to operate your fireplace again!

Call into our showroom to experience the exciting new IntelliFire range of fireplaces.

The beauty of Jetmaster

The Jetmaster system provides brilliant radiant heat from a super efficient fire that is designed to draw perfectly. At the same time it uses heat from the back of the fire, that would otherwise be lost, to create convected heat.

RADIANT HEAT PLUS CONVECTED HEAT

Cool air is drawn under the fire into a super heating chamber. As it heats, it rises and is forced out into the room through the outlet at the top. This proven two way heating system is the real beauty of Jetmaster. The firebox also incorporates a damper control, which governs the rate of burning, reduces heat loss and maximises overall efficiency.

Jetmaster Universal 850 wood burning fireplace with Mini Bouvier mantel, limestone margins and hearth

Jetmaster Universal 700 wood burning fireplace with concrete surround and (floating) hearth

Jetmaster Universal 1050 wood burning fireplace with marble margins and hearth

Jetmaster 700 Campfire gas log fireplace in stainless steel freestanding unit, with stainless steel slimline front and hood, and brushed stainless steel feature flue.

Hot air rises and circulates for round the room comfort —

Fumes go up the flue —

Damper for controlled burning —

Rising hot air is forced through the jet and out into the room —

Air passes into the heating chamber and is heated to maximal temperature over the hottest part of the fire

Removable logpan —

Air at room temperature is drawn into the

Protective Screen

wood and gas fires!

Gas fires with more flame, more heat, more glow at the flick of a switch. Jetmaster is constantly working on design and development to bring you the most realistic, efficient fires with a range of diverse styles to choose from. You can convert your existing fireplace, or simply install into a timber frame using the zero clearance option.

We currently offer an extensive range of open gas fire configurations - your choice of logs, coals, pebbles, topaz or double sided units. The Jetmaster open fire is precision designed to draw beautifully.

Jetmaster 850 Campfire gas log fireplace with Pearcedale mantel, marble margins and hearth

HORIZON

Exciting new range of gas fireplaces for your home!

Horizon freestanding fireplace with Ironbark gas logs, stainless steel surrounds and feature flue.

Horizon Cantilever with gas pebbles and marble base.

Horizon 700 Lowline with gas pebbles and pewter finish trim.

Horizon 700 Lowline with Ironbark logs and painted surround.

The new Horizon series of gas fires from Jetmaster and Kemlan offers style, versatility and ambience.

Horizon gas fireplaces are available in pebbles, logs or coals, with a variable gas input of 55mj, which means you get more flame, more glow and the distinctive design that is 'Horizon'.

Available in a range of fascia trims - stainless steel, black or a selection of colours to complement your decor.

The Horizon range also features a double sided unit and a free-standing version which is also available with stainless steel options.

International Gas Convector

Innovative design, plus beauty in simplicity.

1050 IGC slimline with pebbles and UK Front

1050 IGC with tumbled glass pieces, stainless steel front, louvre and side plates, and 4 sided 100mm stainless steel trim
